

# The Eliminator

## REDUCES VOLUME TO IMPROVE FIT AND BOOST PERFORMANCE!

The Eliminator Custom Tongue attaches in seconds to existing boot tongues with supplied Velcro disks (or permanently with contact cement) and comfortably secures the foot in the heel pocket helping your customers ski and ride better instantly!

### The Eliminator will:

- Eliminate heel lift
- Relieve shin bite
- Reduce excessive calf pressure
- Eliminate instep pain caused by overbuckling, especially in snowboard boots
- Snug cuff fit for skiers and riders with thin calves who max out their buckle settings

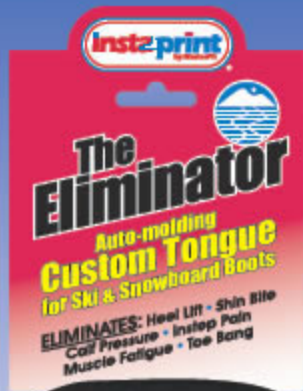

The Eliminator works better the more it's used!  
It begins auto-molding to the shin after just one wearing.

Sizes: Small (fits 22-25 MP), Large (fits 25.5+ MP)
